Personal Info

Hello, I'm a full-stack web developer. I used eloquent javascript to teach myself fundamentals of web technologies - creating markup, manipulating DOM, and building web apps using modern javascript. After working on About 10-15 projects using Vanilla JavaScript, I learned how to use React to Build more ambitious and scalable web applications. Nowadays I'm learning advanced React, NodeJS, and Databases. I am very motivated to learn many new things in technologies, for example, Three.js, Prisma, React Native, Next.js, Python, C, and many others. I devote all my time to programming and building projects. You can see my GitHub - [Github Link](#)

My Projects

- My portfolio [React, threeJS, Typescript, Chakra UI] - [GITHUB](#)
 - Entertainment web app [React, Typescript, Styled-components] - [GITHUB](#)
 - Planet facts website [React, Typescript, Styled-components] - [GITHUB](#)
 - 3D portfolio [ThreeJS, React, Typescript, Styled-components] - [GITHUB](#)
 - Clock app website [React, Typescript, Chakra UI] - [GITHUB](#)
 - Github user search app [React, Styled-components] - [GITHUB](#)
 - Interactive card details [React, Typescript, Chakra UI] - [GITHUB](#)
 - Todo UI [React, Tailwind] - [GITHUB](#)
 - Ecommerce product page [VanillaJS] - [GITHUB](#)
 - Interactive comments section [VanillaJS] - [GITHUB](#)
 - Todo app [VanillaJS] - [GITHUB](#)
 - Check my all repository - [MY GITHUB](#)
-

The tech I love

Tech Stack: React, Typescript, Javascript, NodeJS, SQL, HTML, CSS, Styled-components, Tailwind CSS, Chakra UI, Sass, Git, Github, Express, Linux, Figma.

Languages: English [conversant], Georgian [native]
